Influence of Implantology on Conventional Prosthodontics in Viet Nam

Anh Trân Ngọc
Aesthetics Dentistry
Center of Odontomaxillofacial of HCM city
212 Diê Biên Phu Street, District 3,
Hô Chi Minh City, Viet Nam

After the first case of dental implant was fixtured at IOS(Institute of Odonto-Stomatology) in 1994, we have just started the first step in oral implantology at the Odontomaxillofacial center of HCM city since 1996. 31 partial edentulous patients who came to our clinics randomly were treated by the Microtech system and the Carat ceramic fixed prostheses were observed. This presentation describes a simple method with acceptable price for crown or bridge on oral implants. We hope it can apply for other developing countries like VN.
