As clothing, fashion is changed by life circumstance, reform of social custom, condition of economy, inner or outside every accident and complicatly psychologic a main cause work.

But definite and great accident like revolution or War is originated.

The War effect in clothing, eating, housing life, specially social culture affect social culture have an affect.

Like this War is cause changing the sense of value about the people's life, and it makes a stroke in the history of fashion.

The purpose of this project is to look around about appearing about the distinguishing of clothing after Big War (1st World War, 2nd World War, The Vietnam War, The Gulf War) and about distinguishing of modern clothing after 21c Iraq War.

Woman clothing became simple because of 1st World War.

Suit style got to be generally growing of woman soldier because of 2nd World War and The Vietnam War of 1960's the first half year offered futility of value about life to people.

After all was in vouge hippie look, peasant look, funky look.

Because The Gulf War, mixing america culture of power's symbol and longing about the middle east, in the 1990's bohemian look rised to best fashion code.

And then, after this 3.20 Iraq War, what

changed the History of fashion!

Here will writ down about distinguishing of modern clothing.

First, recovery fashion America and minimalism was a fashion.

In 1960's time led the fashion of world, which is 'Jacqueline Kennedy' style and futurism designer 'Andre Courreges' one-piece style, British designer 'Mary Queente' mini skirt became a fashion not only korea but also another countries.

Second, decorate culture of Europe and ethnic culture effect so much in fashion, in the beginning of 21c that condition have much similar point, so Hippie with romantic items and disco, funky, ethnic style like mixing condition appeared.

In the end military look's fashion is, if clothing style of after War time, everyone understand that military look is to appear from unconsciousness protecting myself.

Look into lately military fashion big pass enter the stage New style with femininity get out of simply in male image helped by level.

The History of War is equal to history of fashion.

War and fashion have the joint ownership, 'War and fashion own the paradox-through the destruction of existing system', I think this project has the meaning.
