## Agenda

Know More, Do More, Spend Less를 위한...

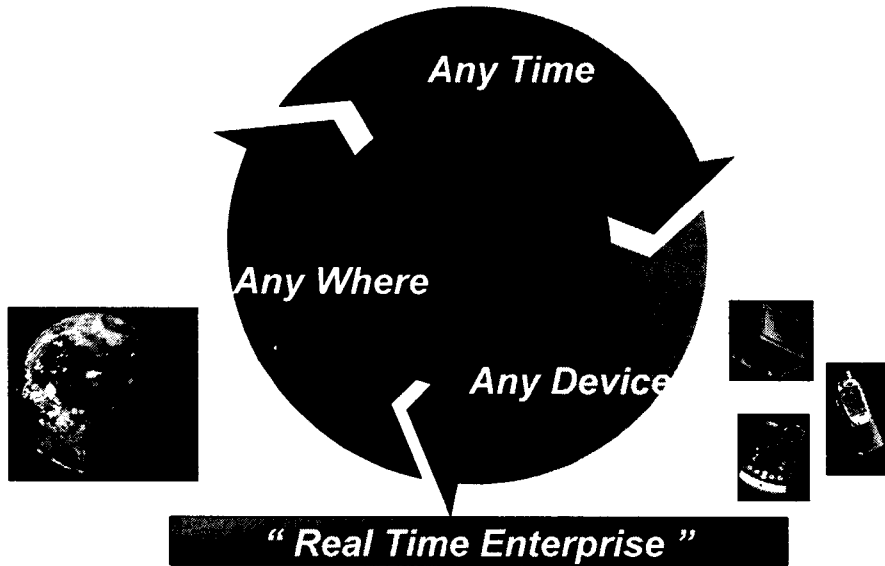

e-Business Suite Concept

Real Time Enterprise를 위한...

e-Business Suite Architecture

ORACLE

## Virtual Collaboration Network

ORACLE

Know More , Do More , Spend Less  
**e-Business Suite Concept**

## **Today's Challenge**

- How to achieve enterprise-wide visibility for better decision making?
- How to refine business processes to enable more effective and efficient productivity?
- How to cope with shrinking budgets and the increased scrutiny of all spending?

ORACLE

**Know More**

ORACLE

# Why is it Hard to Know More?

- Fragmented information
- Siloed business processes

ORACLE

# Know More

## Other Suites Today

**Fragmented Operations  
Difficult to Consolidate**

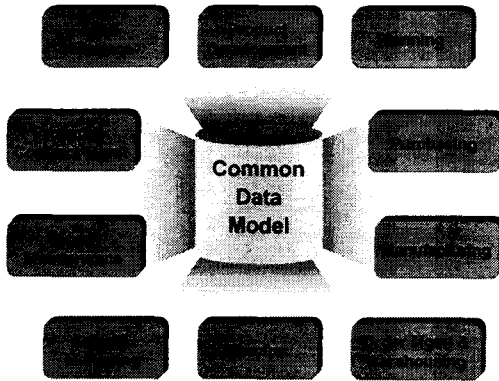

## e-Business Suite

**Unified Information  
Architecture**

ORACLE

## Provide Complete Information

- Single, complete data model
- Store all information in one place, one time
- Track all customer interactions
- As you retire legacy apps, eliminate redundant sources of information

"The fact that in the E-Business Suite the customer is a single entity throughout all his life, from marketing to billing, is critical for us"

- Jean Luc Fort, Project Manager, BULL

ORACLE

Do More

ORACLE

## Why is it Hard to Do More?

- Incomplete automation
- Lack of integrated intelligence
- Siloed business processes
- Complex and disconnected processes

ORACLE

## Do More

### Other Suites Today

**Complex and  
Disconnected Processes**

### e-Business Suite

**Unified Information  
and Action**

ORACLE

# Improve Operational Efficiency

## *Integrate Your Core Processes*

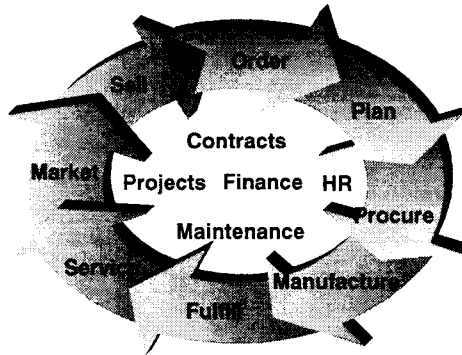

- Enterprise-wide business flows
- Seamless integration
- Fact-based decisions

---

"We enjoy the ability to pass information seamlessly from the time a customer books an order to the time the customer is paying the invoice."

- Lisa Sipe, CIO  
*American Power Conversion*

---

ORACLE

# Spending Less

ORACLE

## Why is it Hard to Spend Less?

- Redundant IT operations
- Complex integration projects

ORACLE

## Simplify Global Operations *But... You Have to Spend Less*

Other Suites Today

Many Data Centers  
Excessive Cost

Global Single Instance

Architected for  
One Global Data Center

ORACLE

## Global Single Instance

	Before		Before
 TransGrid	39 → 1	 Ford	26 → 1
 AFTNA	15 → 1	 AMERICAN TOWER	14 → 1
 Pella	14 → 1	 APC Legendary Reliability™	13 → 1
 C-COR	6 → 1	 Mykrolis	4 → 1

ORACLE

## Eliminate Integration But... You Have to Spend Less

### Typical Environments Today

**Many Interface Points  
to Maintain**

### e-Business Suite

**One Architected Suite**

ORACLE

## Faster Implementation But... You Have to Spend Less

### Other Suites Today

### Business Flow Accelerators

~ 66% Less Time  
~ 30-50% Lower Cost

**Progress Dependent  
Upon Costly Assistance**

**Faster Engagement  
Lowers Cost & Risk**

ORACLE

## Faster on Linux But... You Have to Spend Less

### Current Systems Today

**Big, Expensive  
Enterprise Servers**

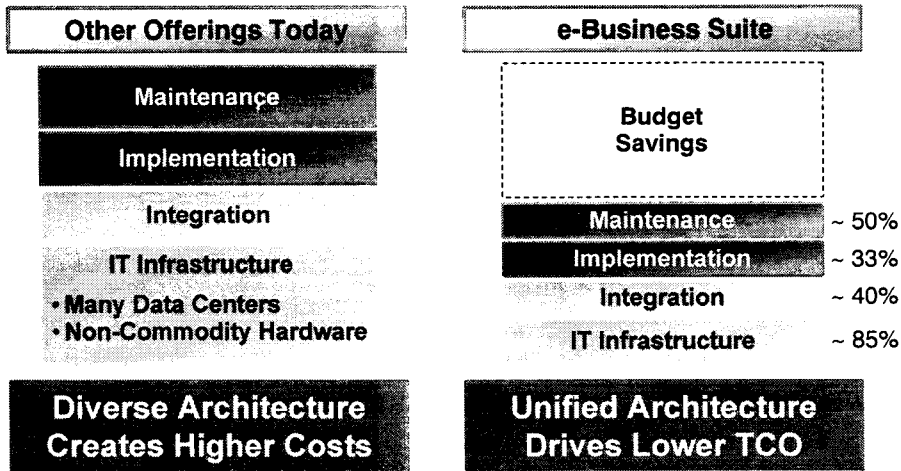

### Clusters & Linux

**Many Small,  
Inexpensive Servers**

ORACLE

## Spend Less

ORACLE

## Impressive Savings

	Savings <i>Timeframe</i>		Savings <i>Timeframe</i>
	€1.1B by 2007		\$200M over 3 years
	\$120M every year		\$64M
	£23M		£30M
	\$15M		\$27M
			\$13M over 5 years

ORACLE

## Impressive Financial Returns

	<u>ROI</u>		<u>ROI</u>
	446%		260%
	400%		246%
	352%		136%
	275%		100%

ORACLE

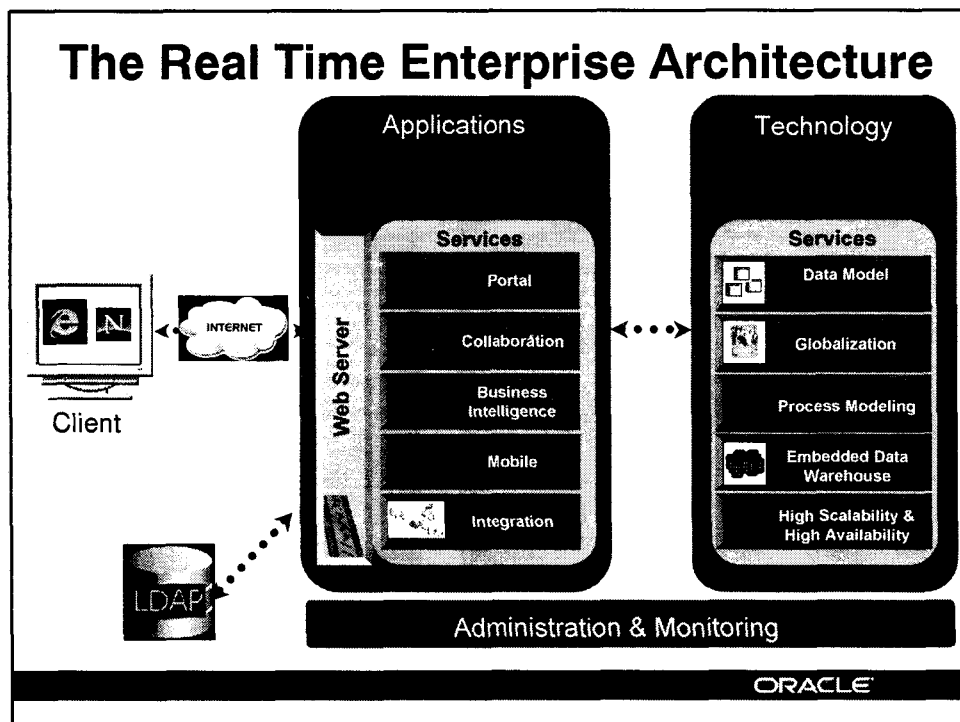

## e-Business Suite

The Only Business Applications Built on a  
Unified Information Architecture

Finance Projects  
 Maintain  
 Service  
 Fulfill  
 Make  
 Procure Plan Order  
 Develop  
 Market  
**Knew More**  
**Do More**  
**Spend Less**

ORACLE

Real Time Enterprise를 위한 ...  
e-Business Suite Architecture

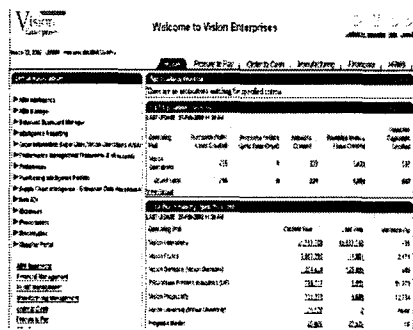

# Application Services

ORACLE

# Single Point Of Access For All Information

Portal

- All information at your disposal
- Single Sign-On
  - For All Applications
- Fully Configurable by user
  - Just Like my.yahoo
- Include pre-define portlets
  - e-Business Suite
  - Transactional & BI
  - Lots of partners: Emails, News, Search, Stock quotes, ...
- Open portal
  - Bring together third party, legacy, & custom data

ORACLE

## Automate & Collaborate

- Add automated database management features
- Utilise Workflow and Alerts to link integrated business processes
- Allow employees to collaborate and access any information across any device type
- Collaborate in real-time with partners

ORACLE

## Business Intelligence

- Pre-defined Analysis and Reports
- Allows Daily Business Intelligence (DBI)
- Complete offer
  - Strategic: Balanced ScoreCard (BSC) and Activity Base Management (ABM)
  - Operational: Business Intelligence System (BIS)
- Use the latest technology
  - Discoverer
  - Reports
- Built-in using the applications security and single sign-on
  - User
  - Responsibility
- Easy to customize

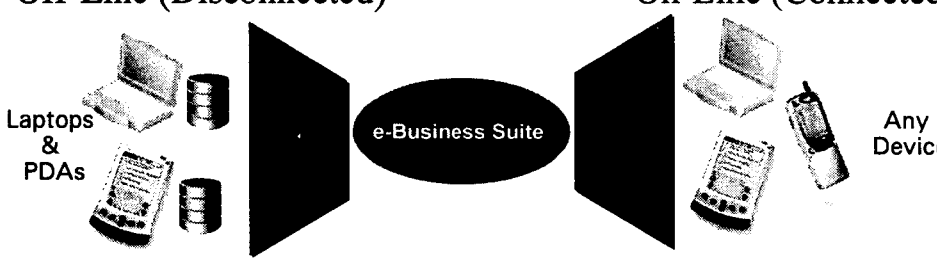

ORACLE

**Mobile**  

## Mobile Offer

- Extends existing e-Business Suite functionality to all mobile devices
- Mobile access to time-critical features increases productivity of customers, employees, suppliers

Off-Line (Disconnected) On-Line (Connected)

e-Business Suite

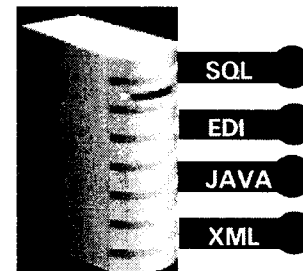

Any Device

**ORACLE**

**Integration**  

## Integration Approach

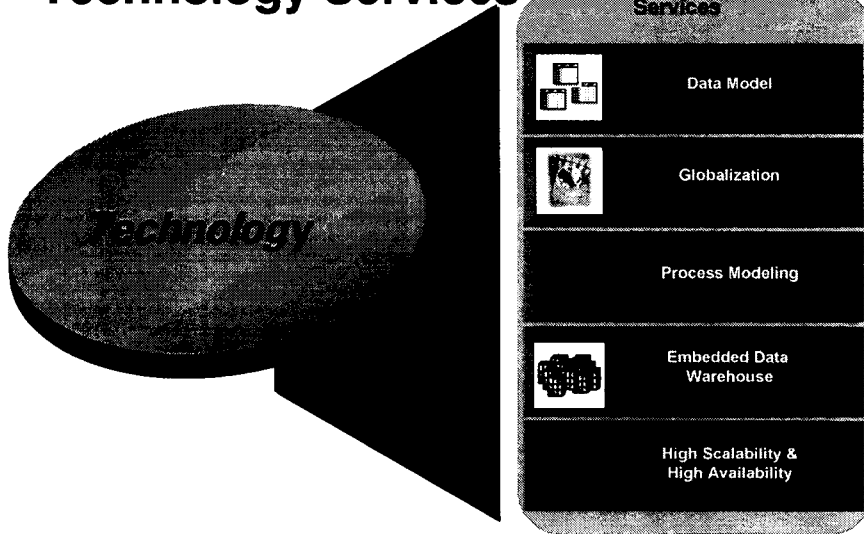

- Integration Points
  - SQL: APIs PL/SQL & Open Interfaces Tables
  - Java: APIs Java
  - EDI: e-Commerce Gateway
  - XML: XML Gateway
- Integration Tools/Framework
  - 9iAS Integration
- Support for emerging standards
  - OAG XML Business Object Documents
  - RosettaNet
  - SOAP
  - Web Services

**ORACLE**

## Technology Services

ORACLE

## Global & Unified Data Model

Data Model

- Single Data Definition
  - All data in one place
- Complete
  - Customers
  - Suppliers
  - Partners
  - Employees
- Better Information
  - Factual Decisions
  - Smart Decisions

ORACLE

## Globalization: Advantages of Instance Consolidation

Globalization

### Multiple Instances

- Fragmented data
- Higher labor costs

### Global Instance

- 
- 

ORACLE

Process Modeling

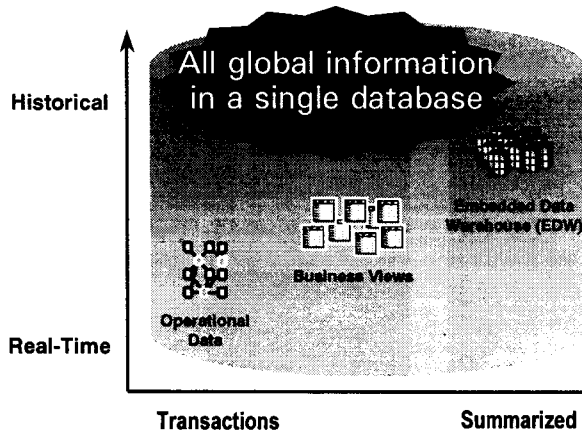

## Process Modeling : One Process Management Engine(Workflow)

- Traditional applications based Workflow
  - Workflow processes embedded in the e-Business Suite
- Business Process Based Integration Workflow
  - e-business integration workflow
  - Model Driven Integration
  - Provides a model of the business process

ORACLE

# Unique Source of Information: Single & Unique Database

Embedded Data Warehouse

- Embedded Data Warehouse (EDW)
- Transactional data with Business Intelligence data
- Drill-down from summarized & historical data to real-time & detailed data
- Cross-functional areas

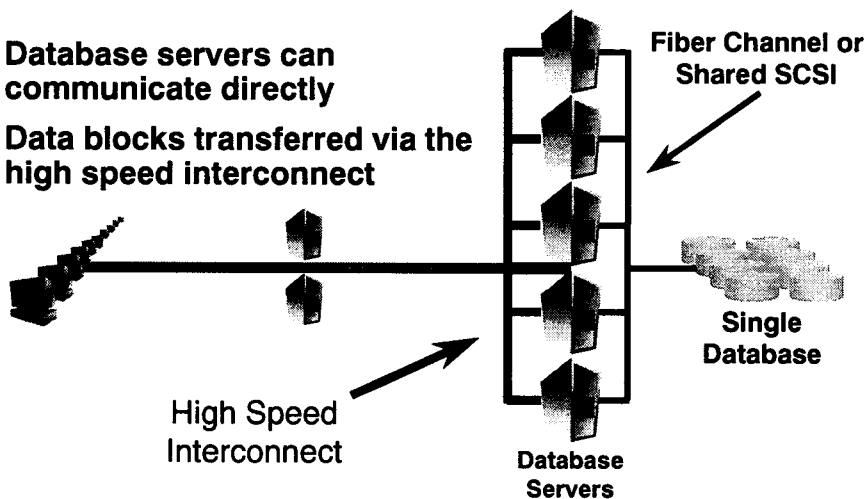

ORACLE

# Real Application Clusters

High Availability & Scalability

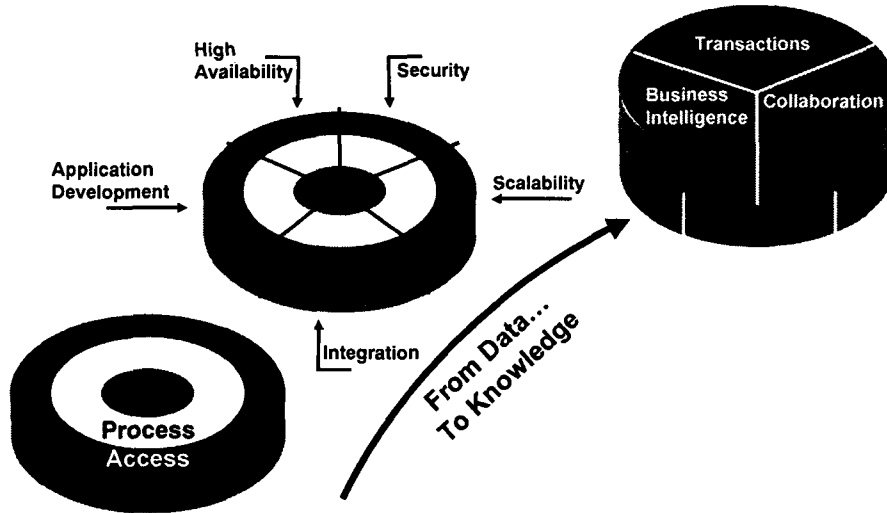

- Database servers can communicate directly
- Data blocks transferred via the high speed interconnect

ORACLE

# The Path To Knowledge
