1. Introduction

PLA is limited to use general apparel because of low strength and low flexibility. And, But PLA is bio-degradable material, eco-friendly. Lyocell is also eco-friendly, and has well-being concept. In this study, PLA/Lyocell knit was used for dyeing test. Low thermal and chemical property of PLA was considered to dyeing condition. K/S, fastness were measured.

2. Experiment

2.1 PLA/Lyocell knit

- yarn
PLA 150/144, Loop length 11.7 cm, width 43.5 inch, 280g/yd, 78C & 30W /inch
Lyocell 30/1, Loop length 12.7 cm, width 44.2 inch, 255g/yd, 56C & 30W /inch
- PLA : Lyocell = 1 : 1

2.2. Dyeing test

- Liquid ratio 1 : 20, 115°C, 50minutes
- Disperse agent 1g/l, acetic acid 0.5g/l
- Reduction clearing : soda ash 1g/l, hydro 0.5g/l, 65°C, 15minutes
- PLA side dyeing, Reduction clearing, and then Lyocell side dyeing

2.3 Dyeing condition for three-combi

Step I : PLA side dyeing (Sample No. 1 ~ No. 14)

Dye	(% o.w.f.)	(% o.w.f.)	(% o.w.f.)
S-Y	0.012	0.62	0.8
S-R	0.009	0.12	0.45

3. Results and conclusion

K/S values of each samples were measured, the value are in the below table.

Table. K/S values of dyed samples

No. of Sample	K/S (Step I) (before RC)	K/S (Step I) (after RC)	K/S 측정 (Step II) (after washing)
1	0.13	0.12	X
2	1.66	1.52	2.87
3	1.93	1.51	6.39
4	0.12	0.10	0.20
5	1.78	1.69	4.69
6	1.74	1.60	4.59
7	0.11	0.11	X
8	1.83	1.69	5.29
9	2.09	1.89	6.90
10	3.05	2.36	25.57
11	2.26	1.94	17.95
12	2.41	2.04	22.74
13	2.32	1.91	9.05
14	2.09	1.60	9.02
