## 摘 要

鬱陵島産 나방은 1929年 趙福成 博士(朝·博 10, 8)에 依해 2種이 報告 되었고 그後 1936年 日人 正木三郎 (昆虫 10 : 5, 267)에 依하여 3種이 追加 報告되었다. 筆者는 1961年 同島에서 採集된 申裕恒氏의 標本을 材料로 8種의 鬱陵島 未記錄種을 追加한다. 그中 2種은 韓國 未記錄種이다.

Hitherto 5 species of moths were announced from the Dagelet Island, situated on the east side of Korea. 2 species were listed by Dr. P.S. Cho(1929)and 3 species by S. Masaki(1936).

The material dealt with in the present list was collected by Mr. Yoo-Hang Shin in July, 1961 on the Dagelet Island.

In this paper are added 8 unrecorded species to the fauna of moth of the Island, two species of which are the first record from Korea.

I wish to express my hearty thanks to Dr. P.S. Cho for his kindness in permitting me to examine the literature of the Entomological Institute of Korea University, and I am also indebted to Mr. Y-H. Shin for gift of valuable specimens.

Those marked with single asterisk(\*)are unrecorded from the Island and with double asterisks(\*\*) from Korea.

- \*1. *Aglossa dimidiata* HAWORTH 비단명나방 Dodong, 1♂, 27 July, 1961(Shin)
- \*2. *Hymenia recurvalis* FABRICIUS 흰꼬리들명나방 Dodong, 1♂, 27 July, 1961(Shin)
- \*3. *Marobotys luctuosalis* GUENEE 포도들명나방  
Dodong, 1♂, 27 July, 1961(Shin)
- \*4. *Cnidocampa flavescens* WALKER 노랑뽕기나방  
Dodong, 1♂, 27 July, 1961(Shin)
5. *Pterodecta federi* BREMER 뽕나방  
Suninnbong, 1♂, 28 July, 1961(Shin)  
Cho(1929) records the species from this Island.
6. *Lymantria dispar chosensis* GOLDSCHMIDT 매미나방  
Suninnbong, 1♂, 28 July, 1961(Shin)  
Cho(1929) records the species from this Island.
7. *Euproctis flava* BREMER 독나방  
Masaki(1936) records the species from this Island.
8. *Spaelotis lucens* BUTLER 버즘밤나방  
Masaki(1936) records the species from this Island.
- \*9. *Dadica truncipennis* HAMPSON 국화밤나방  
Dodong, 1♂, 1♀, 27 July, 1961(Shin)
- \*\*10. *Hydrillodes repungnalis* WALKER 울도짚뽕밤나방  
Dodong, 2♂♂, 27 July, 1961(Shin)
- \*\*11. *Catocala nubila* BUTLER 누비뿔노랑밤나방  
Suninnbong, 1♂, 28 July, 1961(Shin)
- \*12. *Albara japonica* MOORE 쌍줄갈구리나방  
Dodong, 1♂, 27 July, 1961(Shin)  
Kim(1961) records this species from Mt. Jii(South Korea).
13. *Spilosoma nivenus* MENETRIES 제비흰뽕나방  
Masaki(1936) records the species from this Island.
