

外來樹種의 解剖學的 및 物理的 性質에 關한 研究 第 1 報 (*Pinus banksiana*)

沈 鍾 燮 · 趙 在 明

[서울대학교 論文集(自然科學編)第 6 卷; 93 ~ 123, 1957]

A Study on Anatomical and Physical Properties of Exotic Species (First Report: *Pinus banksiana*)

Chong Supp Shim · Jae Myeong Jo

[Universitas Seoulsensis Collectio Theseon Scientia Naturalis, Vol. 6; 93 ~ 123, 1957]

Resume

There are many important exotic species in Korea, such as white pine, pitch pine, jack pine, oak, ash, etc. Some of them are already being used for various construction purposes, in spite of their history imported to and cultivated in Korea being very young.

No study was carried out on the various properties of these exotic species, which are needed for their proper use at present. ■
