

5 Minute Safety Meeting

for the foreign workers

Work with Simgeing Machine

A. Dangers in Simgeing Machine Work

- Danger of gas leakage exists due to use of propane gas, butane gas and LNG.
- Danger of fire or explosion exists because lots of fine dust are scattered during brushing work to raise the fine fuzzes on textile.

B. Safety in Simgeing Machine Work

• Alarm

- Maintain the gas detector to be operated normally all the times.

• Breaker

- When the gas detector is activated, stop the machine immediately. The gas supply valve should be shut off by the interlock system.

• Before and after the work, remove the dust lying around the burner by using vacuum cleaner.

• Remove the floating dust through ventilation system.

모소기 작업안전

가모소기작업의위험요소

- 사용가스는프로판,부탄가스및LNG를사용하기때문에가스누출위험이상존
- 원단에부착된각종잔털을세워주기위한Brushing작업중많은미세먼지가분진상태로비산함으로써화재·폭발위험

나모소기의안전작업

• 경보장치

카스검지기는항상정상작동되도록유지·관리한다.

• 차단장치

카스누출경보기가작동되었을때는신속히기계의작동을정지하고인터록시스템에의한가스공급밸브를차단한다.

• 작업시작전·후버너주변에퇴적된분진을진공청소기등을사용하여제거하여야한다.
