

고소작업 안전수칙 II

Safety Rules for Working at Height II

กฎความปลอดภัยเกี่ยวกับการทำงานในที่สูง II

Quy tắc II về an toàn khi làm việc ở trên cao

한국어

- 1 고소에 공구류를 둘 때에는 끈으로 매든가 적당한 용기에 넣어 안전한 곳에 두든지 걸어 두어야 한다.
- 2 고소에서 공구류, 자재의 잔재 등은 던져서는 안 되고 가능하면 크레인으로 팔레트에 담아서 내리고 그렇지 않을 시는 로프로 묶어서 아래 감시자의 통제하에 내려야 한다.
- 3 사다리, 발판 등의 이상유무를 충분히 점검 후 작업에 임하여야 한다.
- 4 고소 작업시 발판 또는 추락의 위험이 있는 장소에 표준안전난간을 설치하되 그 높이는 바닥면, 발판 또는 경사로의 표면으로부터 90cm 정도에 상부난간대를 유지하여야 하고, 중간대는 45cm 정도의 높이를 유지하여야 한다.
- 5 높이 또는 깊이가 1.5m를 넘는 곳은 승강설비를 해야 하고 이동사다리를 사용할 때는 사다리가 미끄러지거나 넘어지는 것을 방지하여야 한다.
- 6 고소작업 중에는 출입금지 구역을 설정하여 표시함과 동시에 감시원을 둔다.
- 7 작업상 난간이나 발판의 설치 불가능 시는 적합한 장비(크레인)를 사용해야 한다.

English

- 1 When you keep working-tools at elevated area, they shall be fastened with a rope, kept in a safe location after placing them in a proper container, or hung up in a safe manner.
- 2 When moving any objects such as tools, left over materials, etc from a high place to the ground, lower them by using a crane after putting them in a pallet, if practicable. If this is not possible, it shall be handled after tying the objects up with a rope, watching closely by an observer.
- 3 You must commence your work after making inspection for ladders, steps, etc completely to check whether there is any damage or abnormal condition.
- 4 When working at height, standard handrail shall be installed on the platform or any area where there is falling hazards. The upper rail shall be placed at around 90cm from the floor, platform or the ramp surface, while keeping the middle rail at around 45cm.
- 5 When the height or depth of a working area exceeds 1.5 meters, an access device shall be installed. In case of using a mobile ladder, the ladder shall be protected from slipping or toppling.
- 6 When people are working at height, entrance prohibited area shall be set with indicating adequate 'No-Entry' sign and posting a watchman.
- 7 If a handrail or platform cannot be installed due to the nature of the work to do, you must use adequate device such as crane for the work.
