ABSTRACT

The therapeutic use of the wormwood plant *Artemisia absinthium* L. dates back to at least Roman times. There are more than 200 plants in the genus *Artemisia*- including southern wormwood, petite wormwood and Grande wormwood and encompasses about 500 species. The best-known species of wormwood is *Artemisia absinthium*, native to temperate Eurasia and North Africa and is branded for its extreme bitterness. It is a magical greens booze used as carminative to support healthy appetite, balances healthy flora, cleanse the digestive tract of parasite and toxins. It possesses anti-inflammatory, immunomodulatory, hepatoprotective, anti-helminthic and anti-depressant activity. Thujone excites nervous system when taken in small amount. Due to contrary history of wormwood, its application in individuals should be preceded by a thorough and cautious risk-benefit analysis. In this appraisal an attempt is done to validate scientifically, mentioned therapeutic potential of *Artemisia absinthium* in classical Unani literature using PubMed, Science Direct researches.

Keywords Afsanteen, Wormwood, Thujone, Unani, Hepatoprotective

INTRODUCTION

Healing with medicinal plants is as old as mankind itself. Since prehistoric times, in quest for rescue for their disease, the individuals looked for drugs in nature. According to ancient Babylon reports, the use of plants as medicine dates 60,000 years ago. In Greece, written material on herbal medicine dates approximately 2500 years ago. (Msomi, et al., 2018), (Ahmad, et al., 2016), (Dar, et al., 2017), (Petrovska, 2012), (Z, et al., 2017), (Pan, et al., 2014). Plants seems to be safer and potent than conventional biosynthetic drugs (Msomi, et al., 2018). It is stated in scientific literature that up to four billion people (representing 80% of the world's population) rely on herbal medicinal products as a chief basis of healthcare and classical medical practice which comprises the usage of herbs (Ekor, 2014), (Sen, et al., 2017), (Oyebode, et al., 2016), (Merriem, et al., 2013), (Gude, 2013), (Sato, 2012), (Khan, 2016). Medicinal plants are regarded as rich resources of traditional medicines and from these plants many of the modern medicines are produced. According to WHO, around 21,000 plant species have the potential for being used as medicinal plants (Khan, 2016), (Singh, et al., 2018), (Frontasyeva, et al., 2017), (Kumar, et al., 2019). Many herbal drugs pre-owned hepatoprotective, immunomodulatory, anti-oxidant, anti-inflammatory, anticancer activity, anti-depressant etc. activities (Ramawat, et al., 2009), (Sharma, et al., 2019), (Ramana, et al., 2014), (Kumar, et al., 2015) (Nadkarni, 1989), (ARZĀNI (1134-1722), 1923), (Chopra, et al., 1956). Asteraceae is regarded as one of the

largest and highly advanced family with approximately 1528 (Mukherjee, 2006), (TYROCITY, 2018) or 1620 (Petruzzello, 2018), (Panero, et al., 2012) genera and 22750 or 23600 species of herbs, shrubs and trees. Among the Asteraceae family, *Artemisia* is pharmacologically one of the crucial polymorphic genera that encompasses about 400 (Rustaiyan, et al., 2016), (NWE, 2019) to 500 species (Hussain, et al., 2017), (KURSAT, et al., 2015), (Shah , 2014), (Abad, et al., 2013), (Abad, et al., 2012), (Bora, et al., 2011), (Ashraf, et al., 2010) and *Artemisia absinthium* commonly known as Afsanteen/wormwood is a well-known herb, native to temperate Eurasia and North Africa and also found in South America. In India, it is found in Kashmir Valley (Ahmad, et al., 2019), (Chopra, et al., 1956), (ENVIS, 2019). Wormwood is mentioned in almost all the herbal medicinal books of Unani Literature and the Western world. During Hippocratic period and by now, this plant is considered as a comprehensive medicine for all diseases owing to its curative medical powers. The methanolic extract of aerial part of *A. absinthium* possesses anti-inflammatory, analgesic, anticancer, hepatoprotectivity, while essential oil shows antimicrobial (Marwat, et al., 2009), nematocidal activity (Dane, et al., 2016). Different extract shows anti-ulcerogenic, anti-depressant activity (Ahmad, et al., 2019) (Bhat, et al., 2019) (Masoudi, et al., 2017), (Hussain, et al., 2017), (Shafi, et al., 2012), (BORA, et al., 2010). The medical use of *absinthium* is also proved by the freshly published monograph of the European Medicines Agency (HMPC, 2017) and by Southern Cross University (Sherrin, 2008). Afsanteen has robust anthelmintic properties that is why it has been given the name “wormwood” by the prehistoric Egyptians. It is being used in various nervous debilities, liver disorders, skin manifestations etc. In this review paper an attempt is done to compile Unani Literature and Scientific/clinical researches done on wormwood.

Family	Asteraceae/ Compositae	Sunflowers
Genus	Artemisia L.	Sagebrush, wormwood
Species	Artemisia absinthium Linn.	Absinthium, absinth wormwood, common sagewort

silvery-white trichomes, bipinnate to tripinnate with long petioles, its flowers are pale yellow, tubular, and clustered in spherical bent-down heads(capitula), have little ornamental value. Flowering is from early summer to early autumn. Foliage is highly aromatic when bruised.

Microscopically, outer single layer of epidermis of young stem twigs consist of cubical cells with abundant of T-shaped, rather thin-walled trichomes while in mature stem the endodermis has casparyan strips while the cortex and pith are parenchymatous. The middle vascular bundle is larger in size showing prominent xylem and phloem layers. The stomata are present on the lower surface. (Ahmed, et al., 2015) (Ibn Rushd/ Averroes (1126-1198), 2001), (Ministry of AYUSH, 2016), (Baitar)

Geographical Distribution

Artemisia absinthium is native to temperate regions of Eurasia and Northern Africa and in India found in Kashmir at altitudes of 1500- 2100 m. (Ansari, et al., 2019) (Ahamad, et al., 2019) (Kabiruddin), (Khare, 2007), (Goswami), (Kabiruddin, 1996)

Morphological Description

Artemisia absinthium is a woody-based perennial herbaceous plant with fibrous roots. The stem is erect, non-woody, hairy, gray-green and 2-3' tall. The leaves are spirally arranged, greenish-grey above and white below, covered with silky

Active ingredients of *A. absinthium*

Essential oil	Chamazulene, nuciferol butanoate, nuciferol propionate, caryophyllene oxide, phellandrene, pinene, azulene. [10]-thujone, [9]-thujone, myrcene, trans-sabinyl acetate cis- and trans-epoxyocymenes, chrysanthenyl acetate, thujyl alcohol, nerol, isothujyl acetate. Prochamazulenogen. β-pinene, hydrocarbon monoterpenes, sabinene, 1,8-cineole, Artemisia ketone, linalool, trans-verbenol, carvone, curcumene, neryl butyrate, neryl 2-methylbutanoate, neryl 3-methylbutanoate.
Sesquiterpene lactones	absinthin, artemetin, matricin, isoabsinthin, and artemolin Arabsin, artabin, ketopelenolide, santonin-related lactones
Flavonoid	artemitin, rutin, glycosides of quercetin, chlorogenic, caffeic acids, and
Tannins	
Caretenoids	
Phenolic compounds	syringic, chlorogenic, caffeic acid, ferulic acid, sinapic acid, p-hydroxyphenol acidic acid, vanillic acid, salicylic acid, and p-coumaric acid
Ligans	diyangmin and epiyangambin
Glucosides	Absinthin, anabsinthin
Bitter principles	Artamarin, artamaridin, artamaridinin, artamarinin quebrachitol, artemitin, rutin, glycosides of quercetin, 24-zeta-ethylcholest-7,22-dien-3-β-ol

(Bhat, et al., 2019), (Wani, et al., 2014), (Razaeinodehi, et al., 2008), (Msaada, et al., 2015), (Nagzami, 1975), (Kabiruddin, 1996), (Hakim, 2016), (Dymock, et al., 2005), (Sammbamurty, 2006), (Asolkar, et al., 1992), (Ministry of AYUSH, 2016)

There is plethora of reports of experimental and clinical evidences related to its innumerable activity

Hepatoprotective

- Hepatocurative Effect of *Saussurea lappa C.B Clarke* and *Artemisia absinthium, Linn* in Chronic Hepatitis B (Ansari, et al., 2018)
- Ameliorative effects of *Qurs-e-Afsanteen* on Gentamicin induced Hepatotoxicity and Oxidative stress in rabbits (Aziz, et al., 2017)
- In vivo hepatoprotective activity of the aqueous extract of *Artemisia absinthium L.* against chemically and immunologically induced liver injuries in mice (N, et al., 2010)
- Hepatoprotective activity of aqueous-methanol extract of *Artemisia vulgaris* [Journal] // Phytotherapy Research (Ghilani, et al., 2005)
- Preventive and curative effects of *Artemisia absinthium* on acetaminophen and CCl4-induced hepatotoxicity (Ghilani, et al., 1995)

Anti-inflammatory

- Natural Treatments for Fissure in Ano Used by Traditional Persian Scholars, Razi (Rhazes) and Ibn Sina (Avicenna) (Derakshan, 2016)
- Anti-inflammatory, Antioxidant and Antimicrobial Effects of Artemisinin Extracts from *Artemisia L.* (Kim, et al., 2015)
- Anti-inflammatory and Analgesic Activities of *Artemisia absinthium* and Chemical Composition of its Essential Oil (Hadi, et al., 2014)

Anti-helminthic

- Therapeutic efficacy of *Artemisia absinthium* against *Hymenolepis nana*: in vitro and in vivo studies in comparison with the anthelmintic praziquantel (EVN, 2018)
- Flavonoids and Sesquiterpene Lactones from *Artemisia absinthium* and *Tanacetum parthenium* against *Schistosoma mansoni* Worms (Almeida, et al., 2016)
- Anthelmintic activity of extracts of *Artemisia absinthium* against ovine nematodes (Tariq, et al., 2009)
- Steroid-sparing effect of wormwood (*Artemisia absinthium*) in Crohn's disease: a double-blind placebo-controlled study (Omer, et al., 2007)
- Taxonomic Study and Medicinal Importance of Three Selected Species of the Genus *Artemisia Linn* (Qureshi, et al., 2002)

Anti-oxidant

- Role of wormwood (*Artemisia absinthium*) extract on oxidative stress in ameliorating lead induced haematotoxicity (Kharoubi O, et al., 2008)

Immunomodulator

- Estragole and methyl-eugenol-free extract of *Artemisia dracunculus* possesses immunomodulatory effects (Froushani, et al., 2016)
- *Artemisia absinthium* and *Artemisia vulgaris*: A comparative study of infusion polysaccharides (Corrêa-Ferreira, et al., 2014)

Analgesics

- Topical Effects of *Artemisia Absinthium* Ointment and Liniment in Comparison with Piroxicam Gel in Patients with Knee Joint Osteoarthritis: A Randomized Double-Blind Controlled Trial (Basiri, et al., 2017)
- Anti-inflammatory and Analgesic Activities of *Artemisia absinthium* and Chemical Composition of its Essential Oil (Hadi, et al., 2014)
- Anti-inflammatory and analgesic effect of herbal preparation: septilin. [Journal] // Indian Journal of Medical Sciences. (Khanna, et al., 2001)

Appetizer

- The effect of hydro-alcoholic extract of *Artemisia absinthium* on appetite in male rats (Taraghdari, et al., 2015)

Anti-pyretic

- Chemical Composition and Antioxidant and Antimicrobial Activities of Wormwood (*Artemisia*

- *absinthium L.*) Essential Oils and Phenolics (Msaada, et al., 2015)
- Anti-inflammatory and Analgesic Activities of *Artemisia absinthium* and Chemical Composition of its Essential Oil (Hadi , et al., 2014)
- Antipyretic studies on some indigenous Pakistani medicinal plants (Khattak, et al., 1985)

Anti-microbial

- Antimicrobial Activity of *Artemisia absinthium* Against Surgical Wounds Infected by *Staphylococcus aureus* in a Rat Model (Vieira, et al., 2017)
- Volatile composition and antimicrobial activity of the essential oil of *Artemisia absinthium* growing in Western Ghats region of North West Karnataka, India (Joshi, 2013)
- Antimicrobial Activity of *Artemisia absinthium* Against Surgical Wounds Infected by *Staphylococcus aureus* in a Rat Model (Moslemi, et al., 2012)
- Steroid-sparing effect of wormwood (*Artemisia absinthium*) in Crohn's disease: a double-blind placebo-controlled study (Omer, et al., 2007)

Diuretic

- Seasonal variation in the chemical composition, antioxidant activity, and total phenolic content of *Artemisia absinthium* essential oils (Mohammadi, et al., 2015)
- Total phenolic, flavonoids and tannin contents in different extracts of *Artemisia absinthium* (Singh, et al., 2012)
- Composition of the Essential oil of *Artemisia absinthium* from Tajikistan (Sharopov, et al., 2012)

Anti-depressant

- GABA-A Receptor Modulation and Anticonvulsant, Anxiolytic, and Antidepressant Activities of Constituents from *Artemisia indica* Linn (Khan, et al., 2016)
- Chemical Composition and Antioxidant and Antimicrobial Activities of Wormwood (*Artemisia absinthium L.*) Essential Oils and Phenolics (Msaada, et al., 2015)
- Seasonal variation in the chemical composition, antioxidant activity, and total phenolic content of *Artemisia absinthium* essential oils (Mohammadi, et al., 2015)
- Antidepressant and antioxidant activities of *Artemisia absinthium L.* at flowering stage (Mahmoudi, et al., 2009)

Narcotic

- Trypanocidal, trichomonacidal and cytotoxic components of cultivated *Artemisia absinthium Linnaeus* (Asteraceae) essential oil (Martínez-Díaz, et al., 2015)
- Chemical Composition of the Essential Oil of *Artemisia absinthium* Growing Wild in Iran (Razaeinodehi, et al., 2008)

Anti-cancer

- *Artemisia absinthium* (AA): a novel potential complementary and alternative medicine for breast cancer (Shafi, et al., 2012)

Emmenagogues

- Effects of *Artemisia monosperma* ethanolic leaves extract on implantation, mid-term abortion and parturition of pregnant rats (Hijazi, et al., 2010)
- Ethnomedicines used in Trinidad and Tobago for reproductive problems (Lans, 2007)
- Herbal infusions used for induced abortion (Ciganda, et al., 2003)
- Herbal medicinal products during pregnancy: are they safe? (Ernst, 2003)
- Absinthe and γ -aminobutyric acid receptors (Olsen, 2000)

Clinical studies on *Artemisia absinthium*

Chronic Hepatitis B	(Ansari, et al., 2019), (Ansari, et al., 2018)
Fatty Liver	(Kim, et al., 2016), (Ahmed, et al., 2015)
Jaundice	(Taraghdari, et al., 2015), (Okuno, et al.)
Ascites	(Wei, et al., 2019), (Ansari, et al., 2018)
Cirrhosis of Liver	(Kim, et al., 2016), (Mohammadian, et al., 2015)
Anorexia	(Taraghdari, et al., 2015)
Chron's Disease	(S, et al., 2010) (Omer, et al., 2007),
Piles	(Hashempur, et al., 2017)
Fissures	(Derakhshan, 2017)
Worm Infestation	(EVN, 2018)
Depression, Paralysis Weak Memory, Stroke Tremors, Convulsion	(N, et al., 2016), (BORA, et al., 2010) (Kharoubi O, et al., 2008)
Osteoarthritis	(Basiri, et al., 2017)
Anemia	(Kharoubi O, et al., 2008)

Adverse effect

- Nausea & Vomiting
- Headache
- Dryness
- CNS Toxicity (hallucination, seizures, numbness, seizures, numbness, restlessness, tremors, etc)
- Insomnia

(Ogbru, 2019), (WebMD, 2019), (Singh, 2015)

CONCLUSION

Plants seems to be safer at the same time being effective than conventional biosynthetic drugs in the management of different ailments. *A. absinthium* is indexed in endangered category, so consistent efforts should be made to shield this plant species from becoming extinct and it will be useful to nurture this plant at a large scale. Various experiments have demonstrated its hepatoprotective, anticancer, antimalarial, anthelmintic, anti-inflammatory, antidepressant, antiulcer, immunomodulatory and antioxidant activities. Above mentioned studies done so far on the *A. absinthium* confirm the claims of traditional use of this plant but. In the recent years main focus has been on the phytochemical studies to get acquainted with many unknown and known ingredients that can be screened for their therapeutic potential to treat severe health disorders without any side effects. Wormwood has immense potential for researchers and exploring it will lead to identification of new compounds which could be used as drugs for curing common and critical diseases.
