

**ERRATUM “THE BFK-GLUING FORMULA FOR  
ZETA-DETERMINANTS AND THE VALUE OF RELATIVE  
ZETA FUNCTIONS AT ZERO” [J. KOREAN MATH. SOC. 45  
(2008), NO. 5, PP. 1255–1274]**

YOONWEON LEE

In Lemma 2.3, Lemma 3.3 and Corollary 3.4 of the paper [4], the author incorrectly computed the asymptotic expansion of  $\log \text{Det} R(\lambda)$  for  $\lambda \rightarrow \infty$ . This incorrect computation affects Theorem 3.6 and Theorem 4.1, which, as a consequence, are not true. The main mistake is the incorrect computation of the complete symbol of the pseudodifferential operator  $\mathfrak{S}_0$ , which is much more complicated than the author thought. Unfortunately the author has not been able to correct this mistake. Without perfect understanding of the complete symbol of  $\mathfrak{S}_0$ , the method given in this paper may not be successful.

However, in Theorem 3.4 of [2] and Theorem 1.1 of [3], K. Kirsten and the author corrected the mistakes of this paper by using the result of [1].
