I am requesting some essential corrections to our recently published paper, “Preliminary study of artificial intelligence-based fuel-rod pattern analysis of low-quality tomographic image of fuel assembly.”

1. We have discovered an error in the spelling of the first author’s last name. Currently listed as “Saerom Seong,” it should be corrected to “Saerom Sung.” This correction is crucial for maintaining the accuracy of the author’s academic record.

2. Additionally, we need to update the grant number listed in the acknowledgment section of the paper. The current text states grant number “No. G032579811.” This should be corrected to “No. 2021400000070” to accurately reflect the funding details, which is essential for the continuation of our project.

We regret the oversight in our initial submission and sincerely apologize for any inconvenience caused by these errors.
